Released: September 26, 2023

Bug fixes

Area	Description	ID
Game Setup	Fixed some games not showing up in the UI on the Game Setup page.	-

Version 2.4.0

Released: September 19, 2023

New or changed functionality

Steering wheel

Area	Description	ID
Button Configuration	Improve the description of how to adjust the bite point in-game. We want to clarify how this is possible.	1645
Shift Lights	Show the pit limiter LED color pattern on the physical steering wheel when pit limiter is enabled in RaceHub.	1612
Miscellaneous	La Prima wheels can no longer import a profile with latched buttons.	1768

Miscellaneous	The color palette now shows what color is currently selected.	1089
---------------	---------------------------------------------------------------	------

Wheelbase

Area	Description	ID
Torque	As a user, I can change the steering range in smaller steps to accommodate the users' requests. Furthermore, the maximum steering range has increased.	1667
Torque	Added a tooltip to help the user understand that changes take effect immediately without saving. Saving can be done after a race, if it interferes with a game's performance.	1687
Safety	Let the user define when, or if, the wheelbase should turn off the force-feedback when not in use.	1556

RaceHub

Area	Description	ID
Upgrade	As a user, I can update my pedals if I buy an upgrade kit.	624
General	As a user, I can define if RaceHub should launch when Windows starts.	143
General	As a user, I can define if RaceHub should be minimized once it has started up.	143
General	The general settings page has been spilt into two to improve the user experience.	1708
General	Hide the connected devices table and tell the user when no devices are connected.	1625
Miscellaneous	Ability to center RaceHub on your main screen, if RaceHub for some reason is located outside of your current screens. This is possible by right-clicking the RaceHub icon in the tray or using the shortcut Ctrl+Alt+R.	1738
Miscellaneous	Created a shortcut key for finding RaceHub's log files (Ctrl+Alt+L).	1756
Miscellaneous	Different layout improvements.	1708
Miscellaneous	Added right-click functionality to the RaceHub icon in Windows' tray.	1707
Miscellaneous	Updated the pressed/unpressed and basic/advanced toggle buttons to a more intuitive design.	1643

Miscellaneous	Redirected the support link to a different and more relevant web page.	1639
Miscellaneous	RaceHub can now handle the new pedal firmware version numbering.	995
Miscellaneous	Improved the firmware update text.	1593
Miscellaneous	Support for future devices.	1463 1464

Bug fixes

Area	Description	ID
Wheelbase	Default preset is not always selected after restart.	1737
Miscellaneous	Fixed RaceHub's UI crashing if your PC doesn't have an internet connection.	1713
